Shipping and Delivery Policy

Dispatch, delivery estimates, tracking and exceptions

NexaStore Policy Library • 2026 Edition

1. Scope

This policy describes dispatch, estimated delivery, tracking and delivery exceptions for physical products fulfilled by the fictional NexaStore. Seller-fulfilled marketplace items may have different service levels when disclosed on the product or checkout page.

2. Standard Fulfilment Targets

Order type	Dispatch target	Typical delivery target
In-stock accessories	Within 1 business day	2-5 business days after dispatch
In-stock laptops / GPUs	Within 1-2 business days	2-6 business days after dispatch
Nexa workstations	Within 2-4 business days	3-7 business days after dispatch
Configured-to-order systems	Shown at checkout	Based on build completion + carrier transit
Pre-order items	After release/allocation	Estimated date shown on order

3. Delivery Estimates

Delivery dates are estimates unless the checkout explicitly states a guaranteed service. Weekends, public holidays, remote destinations, severe weather, carrier disruption, address verification and high-demand launches can affect transit time.

4. Tracking

Status	Meaning
Order confirmed	Payment/order validation completed
Processing	Inventory allocated or fulfilment preparation underway
Shipped	Carrier has accepted the shipment
Out for delivery	Carrier is attempting final delivery
Delivered	Carrier recorded delivery
Exception	Carrier reports delay, address issue, damage or other problem

5. Address and Delivery Responsibility

• Customers should provide a complete deliverable address and reachable contact details.

• Address changes may not be possible after an order enters fulfilment.

• High-value products may require signature or delivery verification.

• A carrier's 'delivered' scan does not prevent investigation when the customer promptly reports non-receipt.

• Customers should inspect externally damaged packages and report visible transit damage promptly.

6. Delayed or Missing Delivery

Situation	NexaStore handling
Tracking has not updated	Carrier trace may be initiated after the normal scan interval
Past estimated date	Support checks carrier status and fulfilment history
Marked delivered but not received	Delivery investigation and proof-of-delivery review
Shipment confirmed lost	Replacement or refund workflow may be offered
Package damaged in transit	Damaged Product Policy applies

7. Agent Source Boundaries

Question	Authoritative source
Where is my package?	Carrier/tracking tool
What was my promised delivery estimate?	Order service
What is the standard shipping rule?	This policy via RAG
Is the item in stock?	Inventory service
Can a replacement be issued?	Authorized fulfilment/support workflow
Can RAG update tracking?	No. RAG explains policy only.

8. Important

This is a fictional educational policy. Real shipping obligations and consumer rights vary by jurisdiction.
