NexaPlus Membership Benefits Guide

Membership benefits, support privileges and program boundaries

NexaStore Knowledge Series • 2026 Edition

1. NexaPlus Overview

NexaPlus is the fictional NexaStore membership program for customers who frequently purchase computing products, accessories and support services. Membership benefits apply only while the account has an active eligible membership.

Benefit	NexaPlus member	Standard customer
Standard shipping	Included on eligible orders	Order-specific charge may apply
Priority support	Priority queue	Standard queue
Extended return window	30 days on eligible items	Category standard window
Member pricing events	Eligible	Not eligible
AI setup consultation	One 30-minute remote session/year	Not included
Rewards earning boost	1.5x eligible points	Standard points
Early-access launches	Selected products	General availability

2. Benefit Boundaries

• Membership does not override final-sale or non-returnable product restrictions.

• Extended return benefits apply only to eligible purchases made while membership is active.

• Priority support changes queue priority, not warranty coverage.

• Member pricing cannot normally be stacked with excluded promotions unless explicitly stated.

• AI setup consultation provides configuration guidance; it does not guarantee third-party model or application performance.

3. Returns Example

A NexaPlus member may have a 30-day eligible return window where the standard product policy provides 14 days. The agent must first verify active membership and the purchase date from live account/order systems, then retrieve this guide and the Returns and Refund Policy to determine the applicable rule.

4. Membership Lifecycle

State	Benefit treatment
Active	Eligible benefits available
Expired	New orders receive standard-customer benefits
Cancelled, still within paid term	Benefits remain until stated end date unless refund terms say otherwise
Suspended for review	Benefits may be temporarily unavailable
Promotional trial	Only benefits explicitly included in trial apply

5. Agent Data Sources

Question	Source
Is this customer a member?	Customer/membership service
When does membership expire?	Membership service
What benefits exist?	This guide via RAG
Is this order returnable?	Order facts + product facts + Returns Policy + membership benefit
How many rewards points does customer have?	Rewards/account service
Can the LLM grant membership?	No - use an authorized membership workflow

6. Example Agent Scenario

Customer: 'I bought my NexaBook 20 days ago and want to return it. I am a NexaPlus member.' The agent should verify membership status and delivery date using tools. It can then retrieve the standard Returns Policy and this membership guide. If the product is otherwise eligible and the 30-day member benefit applies, the agent can explain the rule and invoke the authorized return workflow.

7. Important

NexaPlus is fictional and exists for the NexaStore enterprise RAG and agentic-AI course case study.
