NexaRewards Loyalty Program Guide

Earn, redeem and understand NexaStore loyalty rewards

NexaStore Knowledge Series • 2026 Edition

1. Program Overview

NexaRewards is the fictional NexaStore points program. Eligible purchases earn points after the order reaches the qualifying state. Points can later be redeemed against eligible purchases, subject to account status, expiration and promotional rules.

Activity	Standard earning	NexaPlus earning
Eligible hardware purchase	1 point per Rs.100	1.5 points per Rs.100
Eligible accessories	1 point per Rs.100	1.5 points per Rs.100
Extended Care purchase	1 point per Rs.100	1.5 points per Rs.100
Gift card purchase	No points	No points
Taxes / shipping	No points	No points
Returned/refunded amount	Points reversed	Points reversed

2. Redemption

Rule	Treatment
Value	100 points = Rs.100 fictional reward value
Minimum redemption	500 points
Maximum per order	Up to 20% of eligible merchandise value
Cash conversion	Not permitted
Transfer	Not transferable between unrelated customer accounts
Expiration	Points expire 12 months after earning if unused

3. Returns and Points

If an order is fully or partially refunded, points earned from the refunded merchandise are reversed. If the customer already spent those points, the account may show a temporary negative points balance until future earning offsets it.

4. Promotions

Promotion	Example rule
Double-points event	2x standard earning on selected eligible products
Category bonus	Additional points on selected AI machines or accessories
NexaPlus multiplier	1.5x base earning unless promotion states another combination rule
Launch bonus	Fixed bonus points after eligible product purchase
Excluded promotion	May explicitly state that rewards earning is unavailable

5. Agent Source Boundaries

Question	Source
Current points balance	Rewards/account service
Why were points reversed?	Order/refund facts + this guide
What is the redemption rule?	This guide via RAG
Is customer NexaPlus?	Membership service
Apply points to checkout	Authorized commerce/rewards tool
Can LLM invent a balance?	No - balance must come from live account data

6. Example

A NexaPlus member buys an eligible Rs.100,000 workstation. Under the fictional standard rules, 1,500 points are earned after the order qualifies. If half the merchandise value is later refunded, the proportional points are reversed. The agent should calculate only after retrieving the actual order/refund values and current program rules.

7. Important

NexaRewards is fictional and intended for the NexaStore RAG and agentic-AI course case study.
